DETAILED ACTION

1. Claims 29-44 are pending.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 29-44 are rejected under 35 U.S.C. 102(e) as being anticipated by Warren et al US Patent No. 5,963,909.
3. With regards to claims 29 and 37, Warren teaches inputting the data to be recorded onto a recording medium loaded on the recording apparatus (Warren, column 8 lines 19-23, master data is received), converting the input data into a predetermined format which is reproducible at the recording apparatus (Warren, column 8 lines 19-26, master data is compressed), generating copy permission information specifying which type of copy permission is associated with the data (Warren, column 8 lines 24-30, SMT data), adding the copy permission information to the converted data (Warren, column 8 lines 24-30, SMT data added to create combined signal) and recording the converted

data with the copy permission information onto the recording medium (Warren, column 8 lines 24-30, SMT data 29-30, Figure 3).

4. With regards to claims 30 and 38, Warren teaches reproducing the data recorded on the recording medium loaded on the recording apparatus (Warren, column 8 lines 35-46).

5. With regards to claims 31 and 39, Warren teaches reading the data recorded on the recording medium (Warren, column 8 lines 35-41), extracting copy permission information from the data recorded on the recording medium (Warren, column 8 lines 40-46, de-multiplexed), generating information for controlling copying of the data to be output in accordance with copy permission specified by the copy permission information (Warren, column 9 lines 49-65), and outputting the data along with the generated information for controlling copying of the data (Warren, column 9 line 65 – column 10 line 12).

6. With regards to claims 32 and 40, Warren teaches transforming the data into a form that cannot be reproduced when copied onto the other recording medium (Warren, column 11 lines 16-22).

7. With regards to claims 33 and 41, Warren teaches determining whether the input data includes information for controlling copying of the data (Warren, column 8 lines 13-31) and wherein the copy permission information is added to the data when the input data does not include any information for controlling copying of the data (Warren, column 8 lines 13-31).

Art Unit: 2134

8. With regards to claims 34, 36, 42, and 44, Warren teaches extracting information for controlling copying of the data included in the input data (Warren, column 10 lines 61-67, column 11 lines 16-21), and comparing a copy restriction level indicated by the information for controlling copying of the data included in the input data with a predetermined copy restriction level (Warren, column 11 lines 16-21), wherein the copy permission information is generated in accordance with the comparison of the copy restriction level and added to the data (Warren, column 11 lines 16-21).

9. With regards to claims 35 and 43, Warren teaches determining whether copy protection of data to be recorded is instructed by a user of the recording apparatus (Warren, column 1 lines 33-50) and wherein the copy permission information is generated and added to the data if copy protection of data to be recorded is instructed (Warren, column 1 lines 33-50).

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

11. Saito et al US Patent No. 5,848,158 discloses a data copyright management system.

12. Stefik US Patent No. 5,715,403 discloses a system for controlling the distribution and use of digital works having attached usage rights.
